Think Vertical, Think Modula

MODULA CLEAN ROOM

THE VERTICAL LIFT MODULE FOR CLEAN ROOMS

Do you work in a clean room environment?
Do you need to prevent **particles from contaminating your products?**

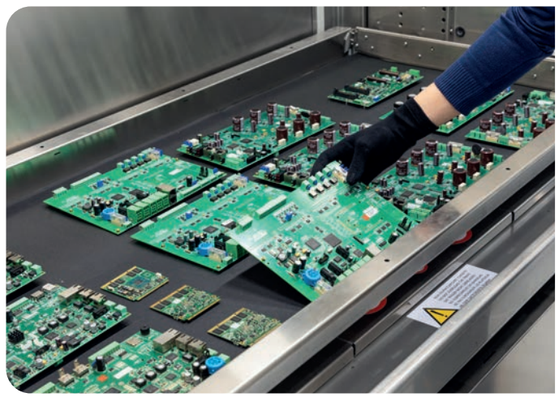

Modula Clean Room is a vertical lift module designed **to store materials inside clean rooms,** protecting goods from contaminants such as dust, dirt and particles.

Most semiconductor Manufacturers, hospitals, chemical, electronic and pharma companies need a storage solution capable of operating **inside clean rooms to prevent contamination of the stored material.**
Whether it is sterile instruments for operating rooms or dust-sensitive components for the production of semiconductors, **Modula Clean Room complies with the ISO 14644 standards and meets classes 6, 7, and 8.**

Modula Clean Room is available in a variety of configurations to meet the specific needs of your industry and application.

**ENSURES MINIMAL QUANTITY OF PARTICLES IN THE AIR.
IDEAL FOR THE PHARMACEUTICAL OR FOOD SECTOR.**

PROTECTING YOUR PRODUCTS SETTING NEW STANDARDS FOR CRITICAL SECTORS

To maintain the lowest amount of particles in the air, Modula Clean Room:

- **Operates** within your designated cleanroom class without compromising its integrity.
- **Minimizes airborne particles,** ensuring the integrety and safety of your products.
- **Prevents the contamination** of the stored material.
- **Limits the production** of dust by the storage system during its operation.
- **Reduces the build-up** of existing dust deposits within the clean room that may enter the storage unit.

Like all Modula Lift Systems, the Modula Clean Room features:

- A **robust structural frame** that securely houses all trays, ensuring stability and long-term reliability.

- **Central elevator system** that retrieves and delivers trays at operator height, optimizing workflow and minimizing manual effort.
- **One or more operator bays,** providing convenient and ergonomically access to stored materials.

TECHNICAL FEATURES

Unit Height: from 2,900 mm to 21,000 mm
Height increments: 200 mm
Tray adjustment pitch: 25 mm

Tray width: from 1,500 mm to 4,100 mm
Tray depth: 654 mm - 857 mm
Net tray payload: 250 - 500 - 750 - 990 kg
Net total payload: from 40,000 kg to 80,000 kg (depending on the configuration)
Gross total payload: from 50,000 kg to 90,000 kg (depending on the configuration)

Throughput: up to 120 trays/hour (depending on the configuration)
Operator interface: industrial console with 10.4" touch screen (Copilot)

Bay type: internal
Maximum product height: 695 mm (S bay)
